

PROFILE SUMMARY

Data Analyst skilled in Python, SQL, Power BI, and machine learning, with hands-on experience in predictive analytics and business intelligence. Passionate about transforming data into actionable insights for decision-making in finance, healthcare, and technology.

INTERNSHIP

GRADUATE TRAINEE – L&T Mindtree

November 2025- March 2026

- Completed intensive training in Java Full Stack Development, gaining hands-on experience in designing and developing enterprise web applications.
- Developed backend applications using Core Java, Object-Oriented Programming (OOP), Spring Boot, and RESTful APIs, implementing business logic and API integration.
- Built responsive and interactive user interfaces using HTML, CSS, JavaScript, and frontend frameworks such as Angular.
- Worked with SQL and JDBC to perform database connectivity, CRUD operations, and data management for full-stack applications.
- Integrated frontend and backend components to develop end-to-end web applications while following software development best practices, including debugging, testing, and code organization.

DATA SCIENCE INTERN – Codealpha

April 2024- June 2024

- Developed LSTM models for stock price forecasting, improving accuracy by 15%, and built regression models for predictive analysis.
- Conducted A/B testing experiments, applying statistical methods to generate actionable insights for decision-making.

DATA SCIENCE INTERN – Coratia Technologies

June 2024- July 2024

- Built an IoT-based predictive maintenance model achieving 92% recall in failure prediction.
- Reduced simulated equipment downtime by ~30% through proactive maintenance insights.

POWER BI MANAGER (TRAINEE) – Omega Healthcare

December 2024- March 2025

- Built an interactive Power BI dashboard to compare employee benefits across business units, automating reporting with DAX and Power Query to cut manual effort by 40%.
- Partnered with client teams to define KPIs (utilization, cost efficiency, coverage) and delivered self-service dashboards, improving stakeholder alignment and decision-making.

FRONT-END DEVELOPER – Pratian Technologies (India) Private limited

November 2022- March 2023

- Developed responsive and interactive web interfaces using HTML5, CSS3, JavaScript, and TypeScript, ensuring cross-browser compatibility and an improved user experience.
- Translated Figma designs into pixel-perfect, user-friendly web pages while implementing dynamic frontend functionality.
- Worked with SQL for basic database operations and collaborated on testing, debugging, and optimizing frontend applications.

PROJECTS

ALZHEIMER'S DISEASE DETECTION USING CNNs

- Designed and implemented a deep learning model using EfficientNetB0 and EfficientNetV2B1 to classify MRI brain scans into four Alzheimer's severity levels (Non-Demented, Very Mild, Mild, and Moderate Demented).
- Addressed class imbalance using data augmentation techniques and compared ordinal vs. categorical classification, leading to improved model accuracy and robustness.
- Evaluated model performance using precision, recall, F1-score, ROC-AUC, and confusion matrix, achieving enhanced diagnostic capability over existing approaches.

ELECTIONS AD SPENDING ANALYSIS

- Conducted data-driven analysis of election ad spending on Facebook and Instagram during the 2024 Indian elections using Python.
- Analyzed datasets on advertisers, locations, and election results; utilized Pandas, Matplotlib, and Seaborn to uncover spending trends and their impact on voter turnout.
- Discovered that higher ad spending does not necessarily translate to higher voter turnout, highlighting various influencing factors in political campaign effectiveness.

ELECTRIC VEHICLES MARKET ANALYSIS & FORECASTING

- Analyzed electric vehicle market trends using Python (Pandas, Seaborn) and visualized EV adoption, manufacturer popularity, and vehicle type distributions.
- Developed an exponential growth model using SciPy to forecast EV adoption trends up to 2029 based on historical registration data.
- Extracted business insights on EV adoption by region, vehicle range trends, and top manufacturers, helping understand market growth patterns.

MAGNIFICENT 7 – (EXCEL, POWER BI)

- Developed an interactive Power BI dashboard for the Magnificent 7 stocks, transforming raw Excel data into actionable insights through data modeling and visualization.
- Designed advanced analytics with KPIs, previous period comparisons, ranked trends, and error bars using DAX calculations for deeper financial analysis.
- Optimized report performance and formatting, implementing dynamic slicers, custom themes, tooltips, and interactive visual elements for a seamless user experience.

AMAZON RETAIL SALES ANALYSIS – (EXCEL)

- Developed an interactive Amazon Retail Sales Dashboard using Excel, incorporating Pivot Tables, Charts, and Slicers for data exploration.
- Analyzed key metrics like total revenue, sales quantity, branch performance, and customer payment preferences.
- Provided data-driven insights to optimize sales strategies and enhance business decision-making.

EDUCATION

MASTER OF TECHNOLOGY ARTIFICIAL INTELLIGENCE AND DATA SCIENCE – SASTRA DEEMED UNIVERSITY – Thanjavur, Tamil Nadu June 2023-2025
Majors: Data Analytics, Data Science, Business Analytics, Artificial Intelligence, Machine Learning.

BACHELOR OF COMPUTER SCIENCE – MAM COLLEGE OF ENGINEERING – Tiruchirappalli, Tamil Nadu June 2018-2022
Majors: Computer Networks, Operating Systems, Web Development.

SKILLS

PROGRAMMING & DATABASE: Python (Pandas, Matplotlib, TensorFlow, PyTorch, ggplot2), SQL (MySQL)
ANALYTICS & VISUALIZATION: Power BI (DAX, Power Query, API), Excel (Pivot Tables, VBA, VLOOKUP, HLOOKUP)
DATASCIENCE & AI: Machine Learning, Deep Learning, Predictive Modeling, Time Series Forecasting
TOOLS & PLATFORMS: Jupyter Notebook, GitHub, Kaggle, Azure (Basic)

CERTIFICATIONS

Deep Learning with PyTorch for Medical Image Analysis
Learn Python: The Complete Python Programming Course
Microsoft Excel: Beginner to Advanced
Data Visualization with PowerBI simplifid
Artificial Intelligence A–Z (2025): Building AI, LLM & ChatGPT Applications
